The figure displays a 10x10 grid of 100 astronomical images, each showing a different celestial object, likely a galaxy or nebula. Each image is accompanied by a numerical label, possibly representing a coordinate or a specific parameter. The labels are arranged in a grid format, with some labels appearing in multiple rows or columns. The objects themselves vary in shape, size, and color, ranging from small, bright spots to large, complex structures with multiple lobes or filaments. The background of the images is typically dark, with the objects appearing in shades of blue, white, and yellow.

The figure displays a sequence of 100 astronomical images, arranged in a grid, showing the evolution of a galaxy cluster. Each image is labeled with a date and time in HH:MM:SS format. The images are organized into 10 rows and 10 columns. The labels are as follows:

The figure displays a sequence of 100 small images arranged in a 10x10 grid, illustrating the evolution of a galaxy cluster over time. Each image is labeled with a timestamp in the format '15:20:MM:SS'. The images show the progression of a galaxy cluster from an initial state to a final state, with various morphological changes and interactions visible. The timestamps range from 15:20:19:460 to 15:20:31:281, indicating a total duration of approximately 12 minutes and 40 seconds. The images show the cluster's structure, including the central region, the outer envelope, and the distribution of galaxies and gas. The evolution is characterized by the growth of the cluster, the formation of a central core, and the development of a complex, irregular shape. The images also show the presence of filaments and substructures, which are typical features of galaxy clusters. The overall trend is one of increasing complexity and size over time, reflecting the dynamic processes of cluster formation and evolution.

The figure displays a time-lapse sequence of 1000 frames, arranged in a 10x10 grid of 100 columns and 10 rows. Each frame shows a biological specimen, likely a cell or microorganism, against a black background. The specimens exhibit various morphological changes over time, including elongation, division, and the formation of multiple lobes or branches. The timestamps for each frame are provided in the following table:

The figure displays a sequence of 100 small images arranged in a 10x10 grid, illustrating the evolution of a galaxy cluster over time. Each image is labeled with a timestamp in the format '15:56:MM:SS'. The images show the progression of a galaxy cluster from an initial state to a final state, with various morphological changes and interactions visible. The timestamps range from 15:56:38:65 to 15:56:47:601, indicating a time interval of approximately 10 minutes and 43 seconds.
