The figure displays a sequence of 100 small images arranged in a grid, showing the evolution of a galaxy cluster over time. Each image is labeled with a timestamp in HH:MM:SS format. The images show the progression of a galaxy cluster from an initial state to a final state, with various morphological changes and interactions visible. The timestamps range from 12:52:21:541 to 12:52:25:969. The images show the cluster's structure, including the central region, the outer envelope, and the distribution of galaxies. The cluster appears to be in the process of merging or interacting with other structures, as evidenced by the changing shape and the presence of multiple cores or substructures. The images are arranged in a grid that roughly follows the chronological order of the timestamps, with some images appearing out of sequence or repeated.
