<b>Purpose of Flight:</b>	Science		
<b>Comments:</b>	<p>The first science flight from Osan Air Base. This flight featured a western peninsula ?Wall? consisting of four lines running from Seoul Air Base to the extreme southern tip of the peninsula along the airway. The lines were constant altitude at different levels from 1000 above the ground to FL240. As the cold front weather system moved into the southern area the lines were shortened to keep clear of clouds. Three low approaches were made to Seoul AB and spiral climbs to the next altitude were accomplished just east of the city.</p>
